### **Provost & Pritchard announces two new staff members with focused specializations**

**Fresno, CA:** Provost & Pritchard Consulting Group is proud to announce the addition of Don Chesney and Rick Iger to the firm's staff. Their specialized knowledge and experience will expand Provost & Pritchard's ability to serve clients throughout California.

"We are pleased to welcome Don Chesney and Rick Iger to our staff," said Dale Melville, Provost & Pritchard's president. "They both have extensive engineering backgrounds and their specialized skills will strengthen our continued ability to serve our clients with quality staff."

Chesney has a diverse resume that includes environmental engineering, wastewater management, and soils analysis. He is a Registered Civil Engineer, a Registered Environmental Assessor, a Certified Crop Advisor and Manure Management Advisor, and a licensed Agricultural Pest Control Advisor. His specific expertise will complement Provost & Pritchard's talented staff of water resources, ag water, and dairy specialists.

Iger is a water resources engineer with over 34 years of specialized experience with flood protection, floodplain management, conjunctive use and water conveyance and storage facilities. He is a licensed civil engineer and has developed projects that enhance the reliability of water supplies, protect property from flooding, and develop funding sources for such projects. Iger has worked extensively with federal, state and local governments, water districts, and landowners throughout the Southern San Joaquin Valley and the Mojave Desert.

Established in 1968, Provost & Pritchard Consulting Group has a strong tradition of engineering and consulting excellence in throughout California. With office locations in Fresno, Clovis, Visalia, Bakersfield, and Oakdale, the firm features a mix of seasoned engineering, planning, surveying, and environmental professionals, complemented by younger staff with fresh ideas and the most up-to-date technical skills. Provost & Pritchard specializes in civil and agricultural engineering, environmental and land use planning, hydrogeology and geology, and surveying services in the areas of water resources, municipal infrastructure, agriculture, site development, and environmental compliance.
