Provost & Pritchard voted “Best Engineering Firm” in Central Valley by The Business Journal’s readers

FRESNO, CA: Provost & Pritchard Consulting Group was named the “Best Engineering Firm” in the Central Valley by readers of The Business Journal. The firm was honored with the award at a reception held on Tuesday, Dec. 9 at the San Joaquin Country Club in Fresno, Calif. This was the first year The Business Journal hosted the Reader’s Choice Awards, where readers visited their website to vote for their favorite businesses and people in 25 different business-to-business categories.

“We are thankful to all of those who took the time to vote Provost & Pritchard as the Best Engineering Firm in the Central Valley,” said Ronald Samuelian, Provost & Pritchard’s president. “It is a terrific tribute, and most importantly, an acknowledgement and appreciation to our staff who are always working diligently to ensure our clients receive the best service and work product for their projects.”

The recognition from The Business Journal’s readership came shortly after the firm’s 2014 national ranking as fourth among the “Best Civil Engineering Firms to Work For” by Civil Engineering News (CE News). The firm was also ranked tenth overall in the Top 100 of all architecture, structural engineering, civil engineering, environmental and multidiscipline firms in the United States and Canada.

“It’s an honor to be recognized both locally and nationally in 2014,” shared Samuelian.

Established in 1968, Provost & Pritchard Consulting Group has a strong tradition of engineering and consulting excellence throughout California. With office locations in Fresno, Clovis, Visalia, Bakersfield, Modesto, Los Banos and Chico, the firm features a mix of seasoned professionals, complemented by younger staff with fresh ideas. Provost & Pritchard specializes in civil and agricultural engineering, environmental and land use planning, hydrogeology and geology, surveying, and construction management services in the areas of water resources, municipal infrastructure, agriculture, site development, and environmental compliance.
