Two newly-licensed engineers at Provost & Pritchard

FRESNO, CA: Provost & Pritchard Consulting Group is proud to announce that two of their staff received notice of passing the difficult California Professional Engineers Exam for Civil Engineering. The two newly-licensed civil engineers are Oscar Daza and Maija Madec.

“Passing the exam is the final step to obtain a professional engineer license; this is a milestone event in an engineer’s professional development”, said Dale Melville, the president of Provost & Pritchard. “We are proud of Oscar and Maija for this major accomplishment in their careers.”

Madec, a graduate of California State University, Chico with a Bachelor of Science degree in Mechanical Engineering, has over five years of experience in the field of municipal water resources. She has worked on numerous water and wastewater treatment and distribution facility projects.

Daza has a PhD in Agricultural and Irrigation Engineering from Utah State University and is an adjunct professor at California Polytechnic State University, San Luis Obispo teaching water resources classes in the Civil and Environmental Engineering Department. Daza has over 25 years of experience in land improvement and reclamation for agricultural production, irrigation and drainage engineering, modeling, simulation and design of pipe and open channel flow systems, and modeling, simulation and optimization of groundwater systems.

Established in 1968, Provost & Pritchard Consulting Group has a strong tradition of engineering and consulting excellence throughout California. With office locations in Fresno, Clovis, Visalia, Bakersfield, Modesto, and Los Banos, the firm features a mix of seasoned engineering, planning, surveying, and environmental professionals, complemented by younger staff with fresh ideas and the most up-to-date technical skills. Provost & Pritchard specializes in civil and agricultural engineering, environmental and land use planning, hydrogeology and geology, surveying, and construction management services in the areas of water resources, municipal infrastructure, agriculture, site development, and environmental compliance.
